Professional Summary

Cybersecurity Intern with hands-on experience in Governance, Risk, and Compliance (GRC), ISO/IEC 27001:2022, threat intelligence, and security audit support at NTT DATA. Developed a Threat Intelligence Dashboard using MISP to automate vulnerability tracking, threat visualization, and security reporting. Experienced in information security principles, networking fundamentals, Linux, and Python, with exposure to Security Operations (SOC), security monitoring, incident response, and threat detection.

Education

KL University

Aug. 2022 – April 2026

Bachelor of Technology in Computer Science (Honors), CGPA: 8.8 | Vijayawada, AP

- Core Computer Science: Data Structures and Algorithms, Operating Systems, Database Management Systems, Computer Networks
- Advanced Topics: Machine Learning, Cloud Computing, Network Security, Big Data Analytics
- Programming: Object-Oriented Programming, Web Development with MERN Stack

Projects

Ecommerce Microservices Platform (React.js, Spring Boot, MySQL, MongoDB)

- Architected a scalable, event-driven microservices ecosystem with Spring Boot for better modularity and coordination.
- Integrated Kafka for asynchronous communication, enhancing responsiveness and fault resilience.

Threat Intelligence Dashboard (React.js, Vite, Node.js, MISP, NVD, CISCO PSIRT)

- Built a live threat intelligence dashboard integrating MISP API data, enabling real-time visualization of vulnerabilities and threats segregated by product and severity.
- Implemented TLP color-coded alerts, Excel export, and a timeline view to streamline InfoSec reporting workflows.

Advanced Customer Segmentation Using Azure Synapse (Azure Data Lake, Apache Spark, Power BI, SQL)

- Implemented customer segmentation by ingesting structured and semi-structured data into Azure Data Lake, processing it with SQL and Spark in Azure Synapse, and applying clustering models.
- Visualized customer clusters and purchasing behaviour in Power BI to support data-driven marketing strategies.

Customer Sentiment Analysis (Python, Pandas, Scikit-learn, Matplotlib, Flask)

- Facilitated cross-functional collaboration between business development and software development teams, ensuring alignment and improving project outcomes.

Experience & Achievements

Cyber Security Intern

March - Present

NTT DATA India – InfoSec Team

- Supported Governance, Risk, and Compliance (GRC) activities, including risk assessments, security audits, and compliance gap analysis aligned with **ISO/IEC 27001:2022** and **ISMS**.
- Developed internal security solutions, including an Audit Management Application and a MISP-based Threat Intelligence Dashboard, to automate vulnerability tracking and security reporting.
- Collaborated with the Information Security team on security policy documentation, control implementation, incident tracking, and audit evidence management.

Lead of Academic and Skill Initiatives

2023 – 2025

Student Governing Body – KL University

- Led the planning, execution, and evaluation of student hackathons, fostering innovation and creativity within the university.
- Collaborated with faculty to create and implement flexible class schedules that better accommodate student learning needs and extracurricular activities.

Technical Skills

Security: GRC, ISO/IEC 27001, ISMS, Threat Intelligence, Risk Assessment, Security Auditing, Compliance, MISP

Operating Systems: Linux, Windows

Networking: TCP/IP, DNS, HTTP/HTTPS, Network Security

Languages: Java, python, SQL

Databases: Oracle, MongoDB, MySQL

Tools: Git, Tableau, Qualys, Splunk and Microsoft Sentinel

Certifications

- AWS Certified Cloud Practitioner – Amazon Web Services
- Cyber Security Foundational Certificates – LinkedIn Learning
- Data Visualization with Tableau – Coursera
- CompTIA Security+ (In Progress)
